Marko Pavlović

Since graduation I primarily worked as full time backend developer, when needed I didn't hesitate to help my teammates on front... Most of my projects were started by myself from scratch, but also I menaged pretty well with existing and inherited projects.
I am reliable, hardworking, energetic and eager to learn new skills. I have experience working as part of a team and individually.

Check out some of my projects : https://markopavle.github.io/cv/
